

Section C: Inspection of Engineering Systems, Equipment, and Materials**CHAPTER 5: INSPECTION OF INERT GAS SYSTEMS****TABLE OF CONTENTS**

	<u>PAGE</u>
A. INTRODUCTION	C5-1
1. Background	C5-1
2. References	C5-1
3. Federal Initiatives	C5-2
B. SYSTEM CONCEPTS	C5-3
1. Reasons for Inerting Systems	C5-3
2. Means of Inerting Cargo Tanks	C5-3
3. Operation of the System	C5-4
4. Inerting Requirements for Chemical Tankers and Gas Carriers	C5-5
5. Problems of Reactive Products	C5-10
6. Basic Inspection Considerations	C5-10
C. TYPICAL SYSTEM COMPONENTS FROM THE GAS SOURCE TO THE TANK	C5-11
1. Boiler Uptake Valves	C5-11
2. IGS Scrubber	C5-11
3. Demister Units	C5-11
4. IGS Blowers	C5-11
5. Pressure Regulating Valve	C5-12
6. Deck Water Seal	C5-12
7. Deck Mechanical Non-Return Valve	C5-13
8. Deck Isolating Valve	C5-17
9. Deck Distribution System	C5-17
10. Typical Gas Venting Arrangements	C5-17
11. System Documentation	C5-18
D. GAS FLOW THROUGH THE IG SYSTEM	C5-19
1. Introduction	C5-19
2. Water Flow	C5-19
3. Refinement of the IG Mixture and Flow Control	C5-20
4. Alternate Blower Arrangements	C5-20
E. INTERNAL INSPECTIONS OF IG SYSTEMS	C5-21
1. Introduction	C5-21
2. Specific Inspection Guidelines	C5-21
F. OPERATIONAL INSPECTIONS	C5-24
1. Introduction	C5-24
2. Inspection Procedures	C5-24
3. Operational Tests	C5-25
G. SAFETY PRECAUTIONS	C5-27
1. Introduction	C5-27
2. References	C5-27
3. Requirements for an Escort	C5-27
4. Personal Caution	C5-27

Section C: Inspection of Engineering Systems, Equipment, and Materials

CHAPTER 5: INSPECTION OF INERT GAS SYSTEMS

	<u>PAGE</u>
5. Requirements for Tank entry	C5-28
6. Ventilation Requirements	C5-28
7. Branch Line Inspectors	C5-29
8. Internal Inspections of Enclosed Spaces	C5-29
H. PRESSURIZATION OF IG SYSTEMS	C5-30
1. General Requirements	C5-30
2. During Periods of Cargo Access	C5-30
